

WOOD-BOARD

MATERIAL

Wood-Board is the ecological board made with pressed wood fiber, density 250 Kg/m³, toxic substances free.

FIELDS OF APPLICATION

Wood-Board is widely used as thermal and soundproofing wall insulation in gaps or on the ceiling.

INSTALLATION

The Wood-Board board is mounted with FORTECEM dB+ cement mortar and sealed onto junctions with Akustik® Band. It is easily shaped on site.

STANDARD DIMENSIONS

Width: mm 1200

Length: mm 2500

By request 2000 mm e 3000 mm

Thickness: mm 19

Dimensional tolerances: pursuant to DIN 7715 Part 2.

WOOD FIBER BOARD FOR THERMAL AND SOUNDPROOFING INSULATION

CE MARKED PRODUCT

TECHNICAL CHARACTERISTICS

- **Usable thermal conductivity:** λ 0,044 W/mK
- **Resistance to water vapour diffusion:** $\mu= 5$
- **Density:** 250 Kg/m³
- **Humidity:** $\leq 12\%$
- **Reaction to fire:** euroclass E
